

CART GUARD PROTECTION

Cart Guard Protection – Built by Dealers, for Dealers. Ultimate Coverage for Every Ride!

WHAT'S COVERED BY CART GUARD PROTECTION

CART GUARD VEHICLE SERVICE CONTRACT (VSC)

The Cart Guard Vehicle Service Contract (VSC) is a reliable and comprehensive protection plan designed to shield you from the unexpected and potentially high repair costs associated with maintaining your golf cart.

COMPREHENSIVE COVERAGE FOR KEY COMPONENTS

This service contract offers extensive coverage for essential components of your golf cart, including the engine, transmission, electrical system, and suspension, ensuring that the critical parts of your vehicle are protected from wear and tear.

OPTIONAL EV BATTERY COVERAGE

For those who own electric golf carts, you can add optional coverage specifically designed to protect the battery, an essential part of your electric vehicle, against any breakdowns or issues that may arise during use.

ULTIMATE PROTECTION FOR YOUR RIDE

The VSC offers a range of benefits to keep you on the move without worries.

24/7 ROADSIDE ASSISTANCE

With nationwide roadside assistance available around the clock, you can get help whenever you need it. Services include towing, jumpstarts (excluding hybrid/EV batteries), flat tire changes with an inflated spare, fluid delivery (oil, water, or fuel, with the cost of fluids not included), key replacement if lost, and emergency rescue and retrieval.

ADDITIONAL BENEFITS

In addition to component coverage and roadside assistance, the VSC provides pick-up and delivery reimbursement of up to \$150 for covered repairs. The coverage is also transferable, which adds resale value if you decide to sell your golf cart. For those with electric golf carts, EV battery coverage ensures your vehicle remains protected in case of a breakdown.
